

Legacy Fund Gift - Making a TJ Education more Accessible

Dear TJ Community:

I am writing to share some very exciting news as TJ is poised to begin celebrating its 30th Anniversary next fall. The School has received a multi-million-dollar legacy fund gift from Debra and David Humphreys. As co-founders of the School, Debra and David have provided ongoing and generous support for TJ's programs and facilities. Their \$15 million 20th Anniversary gift in 2012 enabled us to build the Humphreys Arts and Student Life Complex which doubled the size of the School's facilities and completely transformed the TJ campus. The Humphreys Legacy Fund will make TJ's world-class education even more accessible to students and families in the four-state area.

- **The Humphreys Legacy Fund gift provides \$15 million across the next decade to support more affordable tuition for all students.**
- **Full price tuition will be reset to \$11,000, and current TJ students already served by scholarships and tuition assistance will continue to receive those benefits.**
- **Substantial tuition assistance for families who qualify will continue to be available at TJ.**
- **Our dedication to academic excellence and support for our robust co- and extra-curricular programs, including athletics, the arts, and STEM opportunities, will only be enhanced by this gift.**

Through its Mission, TJ has helped hundreds of students realize their full potential and set them on a path for success in college and in life, instilling lifelong lessons and key virtues supported by our Honor Code. Our continued growth through this gift will enhance the vibrancy of our school community and ensure that TJ is able to thrive for future generations of students. We are so grateful for the generosity displayed through the Humphreys Legacy Fund. This gift will support TJ in its delivery of the best education in the area for the next 30 years, continuing to create engaged citizens prepared to meet their futures with success.

With appreciation,

Laura McDonald
Head of School
